## 2009 CERTIFIED SEED POTATO DIRECTORY

Listed are those growers with potatoes produced for the 2009 crop qualifying for certified seed. Included in the directory are acreage of cultivars approved following field inspections (storage inspections will be completed after harvest), lot identification, generation, and final inspection field readings. Cultivars with acreage less than 0.10 total or private cultivar upon owners' request are not listed. Feel free to inquire from any grower listed about additional information you believe may be of assistance in evaluating their seed lots. The seed grower can verify that any given seed lot you may wish to purchase has been stored separately. It sometimes becomes necessary for seed growers to store similar seed lots of the same cultivar in a single bin which could result in loss of the individual lot identity listed herein.

***IN ADDITION, ALL SEED GENERATIONS IN THE DIRECTORY ARE BASED ON FIELD INSPECTION READINGS. THESE CLASSIFICATIONS COULD CHANGE BECAUSE OF RESULTS OBTAINED DURING STORAGE, SHIPPING POINT INSPECTION, POST HARVEST TESTING, ETC. IT IS THE BUYER'S RESPONSIBILITY TO VERIFY SEED LOT GENERATIONS WITH THE SEED GROWER.***

### RE-CERTIFICATION CONDITIONS

Not all certified seed will be eligible for re-certification. **ONLY THOSE LOTS MEETING POST HARVEST TEST REQUIREMENTS OR OTHER STANDARDS WILL BE APPROVED FOR RE-CERTIFICATION.** A supplementary list will be available following completion of post harvest testing to identify eligible lots.

### EXCEPTION

**Any lot(s) of seed proven to be infected with bacterial ring rot or otherwise unfit for seed will be rejected for certification regardless of the time or place of inspection.**

Certain Colorado regulations may additionally limit the eligibility of seed lots for re-certification. Please note the following explanation which identifies seed lots that are affected by these regulations.

Preceding each grower's name in the Directory is a space which may be blank or have an asterisk (\*). The same symbol is located immediately preceding lot identity in the main body of the Directory.

Blank - The grower's lots listed passed all field inspection requirements and are approved as certified seed. All lots are eligible for re-certification contingent upon required storage inspection and post harvest test results.

- \* - The grower's lots listed passed all field inspection requirements and are approved as certified seed; however, this grower had a lot(s) of seed potatoes in his farming operation rejected due to bacterial ring rot. Any seed lot with an \* in its designation shall not be eligible for re-certification the following year except by the original grower or the farming operation where bacterial ring rot was identified. The \* symbol will also be printed on all of the grower's tags and bulk certificates.

**PLEASE KEEP THESE DESIGNATIONS IN MIND WHEN UTILIZING THIS DIRECTORY.**

### BLACKLEG FIELD READINGS

Blackleg field readings are included in the Colorado Seed Directory in response to numerous requests from seed buyers. Although estimates of blackleg percentages are routinely collected by field inspectors, this data is not necessarily a reliable indicator of blackleg in the crop grown from any given seed lot. Environmental conditions and cultivar response to infection can either magnify or suppress blackleg symptom expression sufficiently to prevent a reasonable correlation between the seed source reading and the next crop grown. These field readings, however, may be a useful indicator of blackleg reinfection into seed lots originating from laboratory produced, tissue-culture propagated stocks.

### LINE SELECTIONS

The Potato Certification Service verifies that each cultivar listed in this Directory has been correctly identified. Some individual seed growers, however, may have developed or obtained from another source, line selections that possess characteristics such as yield potential, maturity, vine and/or tuber type that could be different from any given cultivar as originally described and named. Since such characteristics cannot usually be verified on a reliable basis by conventional certification methods, the responsibility for informing the seed buyer about line selection characteristics rests with the seed grower. Therefore, seed purchasers are urged to consult with the seed grower about line selections that may be included (but not identified) among the seed lots listed.

## DECIMAL PERCENTAGES USED IN REPORTING FIELD READINGS

The field reading percentages used in this Directory are calculated from actual plant counts made visually by inspectors when they walk through the fields. The number of diseased, or otherwise undesirable plants accumulated in any given inspection are divided by the total number of plants observed. The numerical result is a decimal percentage. To help you visualize decimal percentages to actual frequency of diseased plants in a field, it is helpful to express it in terms of diseased plants per 10,000. The table below illustrates how decimal percentages relate to plants per 10,000.

<u>Field Reading Percent</u>	<u>Diseased Plants per 10,000</u>
0.01	1
0.05	5
0.10	10
0.20	20
Etc.	

## EXPLANATION OF GENERATION SYMBOLS

### Generation

Nuclear

### Lab and/or Greenhouse Production

Lab tested; tissue-culture or stem-cut propagations; plantlets, microtubers, or greenhouse produced minitubers.

### Field Production

1 (G1)

First year of field production (planting from nuclear stocks)

2 (G2)

Second year (G1 planting)

3 (G3)

Third year (G2 planting)

4 (G4)

Fourth year (G3 planting)

5 (G5)

Fifth year (G4 planting)

6 (G6)

Last year of field production (G5 planting). G6 stocks cannot be re-entered for certification.

Non-Generation Certified (NGC)

Planted from certified stocks of cultivars for which tissue-culture derived, lab tested seed sources are temporarily not available. NGC stocks must meet qualifications for re-certification and are inspected and classified according to the disease tolerances and all applicable rules and regulations established for G6.

Experimental (EXP)

Includes unnamed "seedling" clones (Please see Special Requirements for Experimental Class Seed Potatoes in the appendix of this Directory).

## EXPLANATION OF LOT NUMBER DESIGNATIONS

Each lot number consists of several parts. For example, the following lot number "09008ATL41" consists of...

**09** = 2009: the year of production

**008** = Summit Farms: the grower's individual ID number

**ATL** = Atlantic: the cultivar designation

**4** = generation 4: the generation of the seed lot

**1** = the first lot of generation 4 Atlantic seed on grower ID 008: The number of individual lots of that particular cultivar by generation. There may be more than one lot of a particular cultivar by generation. Numbers would progress; 2, 3, 4, etc. based upon the actual number of similar lots on the grower's farm.

We hope this explanation will clarify how each lot number is derived.

Variety Mix	0	0.07	0.25
Bacterial Ring Rot	0	0	0
Blackleg	0	0.1	4.0

### **NUCLEAR SEED PRODUCERS**

In 2009 the following growers and independent laboratories produced lab and/or greenhouse nuclear stocks for entry into the Colorado Certified Seed Potato program. For further information regarding these stocks, please contact the growers/labs or the Potato Certification Service.

#### **CSS Farms (719) 676-2791**

Atlantic, Blazer Russet, Classic Russet, French Fingerling, Granola, LaRatte, Pike, Purple Peruvian, Red LaSoda, Rose Finn Apple, Russet Norkotah, Russet Norkotah (Selections 3 & 296), Snowden, Yukon Gold, CO94035-15RU, CO99100-1RU, NY139, and Frito Lay Lines.

#### **Gunnels Farms (719) 754-2471**

Blazer Russet, Canela Russet, Classic Russet, Rio Grande Russet, and Russet Nugget.

#### **Martinez Farms (719) 852-2498**

Atlantic, CalWhite, Canela Russet, Chieftain, Classic Russet, Rio Grande Russet, Russet Norkotah, Russet Norkotah (Selections 3, 8, 223, 278 & 296), and Yukon Gold.

#### **Milk Ranch Potatoes, LLC (970) 596-6650**

All Blue, Banana, Caribe, Carola, Colorado Rose, Crotte D Ours, Dazoc, Desiree, Green Mountain, Irish Cobbler, King Edward, LaRatte, Mountain Rose, Nicola, Nooksack, Purple Majesty, Red Cloud, Red Gold.

#### **Rockey Farms, LLC (719) 754-3744**

Banana, Bintje, Carola, Colorado Rose, Desiree, French Fingerling, German Butterball, LaRatte, Mountain Rose, Purple Majesty, Purple Viking, Red Gold, Rose Finn Apple, Rote Erstling, Sangre Selection 11, Yukon Gold.

### **San Luis Valley Research Center (719) 754-3594**

All Blue, Atlantic, Canela Russet, Centennial Russet, Colorado Rose, Ivory Crisp, Keystone Russet, Mountain Rose, Norland-Dark Red, Purple Majesty, Purple Peruvian, Ranger Russet, Red LaSoda, Red McClure, Rio Colorado, Rio Grande Russet, Russet Burbank, Russet Norkotah, Russet Norkotah (Selections 3 & 8), Russet Nugget, Shepody, Silverton Russet, Snowden, Ute Russet, Yukon Gold, AC95062-1RU, CO85026-4RU, CO86218-2R, CO94035-15RU, CO95051-7W, CO95086-8RU, CO99053-3RU, CO99053-4RU, CO99076-6R, CO99100-1RU, CO99256-2R, CO99053-3RU, CO99076-6R, and CO99256-2R.

### **Summit Farms, Inc. (719) 754-3613**

Austrian Crescent, Banana, Blazer Russet, Canela Russet, Chipeta, Crispin, Purple Majesty, Rio Grande Russet, Russet Norkotah (Selections 3 & 8), and Frito Lay Lines.

### **Summit Plant Labs Inc. (970) 224-2021**

Blazer Russet, Canela Russet, Centennial Russet, Classic Russet, Eclipse, Gala, Granola, Innovator, Kueka Gold, Lambada, Norland-Dark Red, Pike, Puren, Purple Majesty, Rio Grande Russet, Romanze, Russet Norkotah (Selections 3, 8, & 112), Russet Nugget, Yukon Gold, CO94035-15RU, US 87-92, US 250-97, US 285-97, US 584-99, and US 766-99.

### **Worley Seed (719) 852-4096**

Atlantic, Canela Russet, Centennial Russet, Chipeta, Colorado Rose, Keystone Russet, Latona, Mountain Rose, Purple Majesty, Rio Grande Russet, Russet Nugget, Sangre Selection 11, CO86218-2R, and CO94035-15RU.

### **Zapata Seed Co. (719) 754-9048**

Alegria, Blazer Russet, Canela Russet, Centennial Russet, Classic Russet, Colorado Rose, Premier Russet, Rio Grande Russet, Russet Norkotah (Selections 3, 112, 278 & 296), Yukon Gold, AC99375-1RU, CO94035-15RU, CO99053-3RU, CO99053-4RU, and CO99100-1RU.

---

## **GENERATION 1**

All Generation 1 seed stocks produced in Colorado must meet rigid standards for certification. Since all lots must meet the same standards for all diseases and conditions as presented in the Colorado Rules and Regulations (G1), they are listed without readings on a grower, cultivar/clone, and acreage basis. For further information about these stocks, please contact either the individual grower or the Potato Certification Service.

### **Blue Sky Farms**

Blazer Russet, 0.1; Canela Russet, 0.2; Classic Russet, 0.2; and Rio Grande Russet, 0.2.

### **Bothell Seed LLC**

Summit Farms, LLC	09008B6431	35.00	EXP2G3								

**T- Trace (less than 0.1%); blank space indicates NONE OBSERVED during inspection.**

**APPENDIX**  
**TAGS, BULK CERTIFICATES, SEALS**

- a. No potatoes are recognized as officially certified unless properly tagged or identified with a bulk certificate. Illegal use of tags or bulk certificates will be prosecuted.
- b. Tags or bulk certificates will be issued only to the applicant or his agent. **NO MUTILATION OF TAGS OR BULK CERTIFICATES, BY WRITING OR MARKING OVER, OR OTHERWISE ALTERING ORIGINAL INFORMATION PRINTED THEREON, WILL BE PERMITTED.** The responsibility of proper use of tags and bulk certificates is placed on the person (CCPGA member) to whom such articles have been issued.
- c. A metal seal shall be placed on the conveyance doors of bulk shipment containers identified by a bulk certificate.
- d. Special permission may be granted by the CCPGA Board of Directors to imprint a duplicate image of an official Colorado Certified Tag on a small plastic bag (3 lbs. to 10 lbs.) to be used for marketing small quantities of certified seed potatoes. The art work layout must be approved by the Potato Certification Service prior to printing. Information normally printed on the Colorado seed tag (i.e., seed grower's name, cultivar, crop year, lot number, and maximum tuber size) will be printed on the bag in order that the reader can readily identify the seed source. One completed copy of a bag bearing all of the above mentioned information related to a given shipment must be filed with the Potato Certification Service. All such shipments must comply with designated grade inspection requirements. A bulk certificate will accompany each load.

**GRADES AND GRADE INSPECTION**

- a. All Certified Seed Potatoes must be graded to conform with the Colorado standard grades and sizes for seed potatoes unless a signed waiver of grade inspection has been obtained from the purchaser as outlined in following paragraphs d-e-h.
- b. All seed potatoes must be shipped under tags or bulk certificates that represent the grade to which they have been sorted. Potatoes failing to meet the grade specified on the tag or bulk certificate will be; (1) resorted to meet the grade requirements, (2) re-tagged with new tags or re-issued a new bulk certificate representative of the grade of the potatoes, or (3) the tags must be removed.
- c. All shipments must be inspected by a Federal/State Inspector at the time of shipment. The Federal/State Inspection Service is responsible for inspecting seed shipments to verify that proper grade standards have been met. If a "zero tolerance" disease such as bacterial ring rot or root knot nematode is suspected or any other condition which may disqualify a seed lot from certification is discovered during the inspection, the Potato Certification Service will be notified by the seed grower and suspect tubers submitted to the Potato Certification Service so additional procedures can be implemented to identify and confirm the true nature of the problem. Upon confirmation of a "zero tolerance" disease or pest, the remaining portion of the affected lot will be rejected from certification and it will be the responsibility of the seed grower to notify all recipients of the previous shipments of the lot of the finding of a "zero tolerance" disease or pest.
- d. Seed cut prior to shipment out of any Marketing Order Area must be accompanied by a signed cut seed disclaimer and waiver, and an official tag or bulk certificate indicating that the seed potatoes are "CUT SEED."
- e. Each lot sold within a Marketing Order Area shall be inspected by a Federal/State Inspector unless the inspection, as determined by the Federal/State Inspection Service, cannot be performed in a timely manner (one hour or less), then a waiver of inspection may be utilized.
- f. All Certified Seed Potatoes marketed in bags and carrying a tag must meet the highest grade requirements indicated by either the bag or the colored tag. U.S. No. 1 Seed Grade is not strictly a U.S. No. 1 grade, and may not be marketed in bags branded as U.S. No. 1.
- g. All Certified Seed Potatoes exported outside of the U.S. shall meet the U.S. EXPORT "SEED POTATOES" standards for the given class being shipped.
- h. Certified Seed Potatoes marketed expressly for use as garden seed and shipped in quantities less than 10 cwt per cultivar or clone within the same load shall be exempt from Federal/State grade inspection. However, a certificate of privilege shall be obtained from the Marketing Order (Colorado Potato Administrative Committee - Area II) verifying the load's use as garden seed and the quantity shipped, and a waiver of grade inspection must be secured

from the purchaser at the time of delivery or acceptance.

**Colorado Blue Tag Grade** shall consist of potatoes which meet the requirements of the disease tolerances and grade standards previously listed for **CERTIFIED SEED POTATOES**. In addition, they shall be graded to conform with the U.S. No. 1 Seed Potatoes Grade as defined under U.S. Standards for Grades of Seed Potatoes with the following exceptions:

1. Not more than 1% of the potatoes shall be damaged by dry rot.
2. Size shall be 1-1/2" to 12 oz., size is not required on the tag, a smaller maximum however, will be specified on the tag or bulk certificate.
3. Not more than 3% of the potatoes in any lot may be below the specified size and, in addition, not more than 8% may be above the specified size.
4. Physiological internal pigmentation shall not be considered a grade factor.

**Colorado Yellow Tag Grade** shall consist of potatoes which meet the requirements of the disease tolerances and grade standards previously listed for **CERTIFIED SEED POTATOES**. This grade is intended to provide the buyer and seller an opportunity to establish certain mutually agreed upon specifications not allowed in the Colorado Blue Tag Grade. The potatoes must be graded to conform with the U.S. No. 1 Seed Potatoes Grade as defined under U.S. Standards for Grades of Seed Potatoes with the following exceptions:

1. Soft rot shall not exceed 1%.
2. Tuber size shall be specified on the tag or bulk certificate. Tolerances for specified size limits: Not more than 3% of the potatoes in any lot may be below the stated minimum and, in addition, not more than 10% may be above the stated maximum.
3. Tubers shall not be seriously damaged by external defects, or seriously misshapen unless otherwise specified, and shall not be more restrictive than the U.S. No. 1 Grade.
4. Physiological internal pigmentation shall not be considered a grade factor.

Applications of Tolerances: The application of grade and size tolerances shall be as outlined in the United States Standards for Potatoes, Section 51.3003.

**U.S. Export "Seed Potatoes"** shall consist of potatoes which meet the requirements, disease tolerances and grade standards for international export as listed under Appendix P, USDA/APHIS Export Certification Manual; **U.S. EXPORT STANDARDS FOR SEED POTATOES** <sup>3/99</sup>.

### **SPECIAL REQUIREMENTS FOR EXPERIMENTAL CLASS SEED POTATOES**

The Memorandum of Understanding between the Colorado Certified Potato Growers' Association and the Colorado State Board of Agriculture authorizes the Potato Certification Service to "cooperate with the Experiment Station in increasing and releasing new varieties of potatoes developed by the Experiment Station," thus it becomes necessary to develop acceptable guidelines for conducting the testing and seed increase program. In this respect, it is important to acknowledge the unavoidable limitations to the visual inspection process encountered when the disease symptom expression of any potato clone is unknown at the time a seed grower would like to enter it for certification. Therefore, the Experimental Seed Class was established to expedite and facilitate field testing of numbered potato clones being considered for naming and official release. Two categories of this Seed Class were established.

**Category 1** will include only unnamed "Seedling" potato clones involved in the field testing phase of a potato cultivar development program on which bacterial ring rot and/or leafroll virus symptom expression is unknown. Seed stocks of such clones will not be eligible for certified tags or bulk certificates, nor will they be listed in the Seed Directory. Field plantings of such clones will be inspected and a written report submitted to the Leader of the Cultivar Development Program. When adequate field test data on disease expression and other performance characteristics has been collected to justify further evaluation on seed growers farms, any given clone may be transferred to Category 2 of the Experimental Seed Class. This decision will be made jointly by the Leader of the Cultivar Development Program, the Potato Certification Service and the Seed Improvement Committee of the Colorado Certified Potato Growers' Association.

**Category 2** seed lots will include only unnamed "Seedling" clones whose symptom expression of bacterial ring rot and potato leafroll virus are known to be adequate under Colorado field conditions. Such seed lots will be eligible for entry into the certification program on the following basis: There will be three years production allowed for Experimental Seed Class - Non-Generation Category 2 stocks. At the end of three years, the status of these stocks will be reviewed and, where possible, these stocks will be phased out and replaced with Limited Generation seed sources. If this is not possible, an annual review will be conducted to verify the status of the stocks. This decision will be made jointly by the Leader of the Cultivar Development Program, the Potato Certification Service and the Seed Improvement Committee of the Colorado

Certified Potato Growers' Association. Non-Generation Category 2 seed lots will be inspected and classified according to the disease tolerances and all of the applicable Rules and Regulations established for Generation 6. All stocks which meet the criteria for certification will be listed in the Seed Directory. The symbols "Exp 2-" followed by a number designating the years in the field after initial release (i.e., Exp 2-1, Exp 2-2, etc.) will be printed both in the Seed Directory and on tags and bulk certificates. Limited Generation sources of these stocks will carry the same designations with the exception that the symbols after "Exp 2-" will reflect their status from the Limited Generation program, (i.e., Exp 2-G1, Exp 2-G2, etc.). Because of the limited knowledge concerning potential disease reactions, and/or other problems in these seed stocks, the seed seller must obtain and submit to the Potato Certification Service an affidavit signed by the seed buyer prior to seed shipment which states that the buyer is willing to accept the risks involved with purchasing experimental seed. This affidavit or its equivalent will be kept with the tag or bulk certificate order in the grower's Potato Certification Service file. Also, it is understood that experimental seed stocks may be rejected at any time due to uncommon disease reactions.

Any seed grower/organization entering numbered potato selections for seed increase and evaluation in the potato certification program also agrees to abide by an agreement with the Colorado State University Agricultural Experiment Station, or to obtain written authorization from the potato breeding program from which the numbered potato selections originate. The CSU agreement "Notice to Receivers of Experimental Potato Selections" consists in part of the following:

**COLORADO STATE UNIVERSITY AGREES TO:**

1. Supply seed stocks or grant permission to utilize these stocks for further propagation and evaluation to the grower applicant.
2. The term of this agreement will be for a one year period beginning upon seed grower/organization receipt of the numbered stocks.

**BY ACCEPTANCE OF SUCH POTATOES, THE SEED GROWER/ORGANIZATION AGREES TO:**

1. Enter crop for certification. These stocks will be grown in accordance with the Rules and Regulations of the seed potato certification program for the appropriate seed class using generally accepted cultural practices.
2. Furnish land and labor, and meet all expenses involved in production and certification of the crop.
3. Permit representatives of the University to make observations and to obtain samples if desired.
4. Not to further propagate or distribute seed stocks of this (these) selections for propagation beyond the terms of this agreement unless authorized by the University.
5. Dispose of any numbered selection discarded from the Potato Cultivar Development Program. These stocks will not be eligible for entrance in any seed potato certification program unless authorized by the University.
6. Special disposition instructions: As directed by Cultivar Development Program Leader.
7. A meeting between the Seed Grower(s)/Organization Representative(s), the Seed Improvement Committee of the Colorado Certified Potato Growers' Association, the Potato Certification Service and the Project Leader of the Potato Cultivar Development Program prior to January 1st to establish guidelines on price and method of distribution of seed.
8. Not hold the University or its representatives financially liable for losses incurred as a result of production and/or disposition of this seed.

**IT IS MUTUALLY AGREED:**

1. The proceeds from the crop produced under this agreement shall be the property of the Seed Grower/Organization that submitted the stocks for certification.
2. That information derived from these evaluations shall be jointly shared by the parties to this agreement.
3. That the selections may be legally protected under the federal Plant Variety Protection Act or other mechanisms that may require royalty payments before being grown commercially.

Colorado Potato Certification Service would like to acknowledge

**Mr. Pete Forster**

**Mr. Gordon Hankins**

San Luis Valley representatives of

**Syngenta Crop Protection, Inc.**

for supplying necessary chemicals used in our Post Harvest Test plots.

Mr. Hankins can be reached at

970-225-0396

970-481-3297 (cell)

[gordon.hankins@syngenta.com](mailto:gordon.hankins@syngenta.com)

Chemicals available include:

Actara®, Bravo®, Endigo®, Platinum®, Quadris®, and Revus Top®, among others.

Thank you for your support of Colorado Certified Seed Potatoes

and the general potato industry of the San Luis Valley!

Prepared by the  
Certification Section of the Potato Association of America

Revision Date: May 2009

<sup>1</sup>The purpose of this table is to express equivalency of terms used by various certification agencies for seed potatoes harvested from a series of successive field plantings. For specific criteria relating to disease tolerances and other requirements, the reader is referred to the certification regulations of the agency in question.

<sup>2</sup>The first field planting utilizes laboratory-tested stocks which may be tissue-cultured plantlets, greenhouse-produced minitubers, stem cuttings, or line selections. Contact agencies for details as to types of stocks planted in their programs.

<sup>3</sup>Term used by agency for seed potatoes for a particular year in the field: C=certified, E=elite, F=foundation, G=generation, N=nuclear, PE=pre-elite.

<sup>4</sup>If lots originate at Cornell-Uihlein Farm, the first three generations (G1-G3) are also designated by a AU@ to denote source.

<sup>5</sup>Lots NOT originating at the UW Lelah Starks Elite Foundation Seed Potato Farm are designated Gn where n = years in the field.

<sup>6</sup>FY = Field Year

<sup>7</sup> For information on the class of a lot, see the seed directory.
